

BUC SDG 9

industry, innovation and infrastructure

SDG9 has four metrics:

- 1- Research on industry, innovation and infrastructure
- 2- Patents
- 3- Number of university spin-offs
- 4- Research income from industry

The first metric which is related to publications, and the second one, patents, THE gets their data directly from Scopus. No data needed to be supplied by the university.

For metric number 3, as Badr university is a new university which was established in 2014, there is no spin-offs registered yet but the university encourages students to develop their business ideas and registering patents through TICO office which was established to help academic and students to develop patent-based business.

The fourth metric includes information about funds and grants that the university have got it through the last year. It also require information about the number of employees in the university in academia and administration.
