

Community outreaching

1. Purpose

The purpose of the **Executive Plan for the Community Service and Environmental Development Committee** is to:

- Strengthen the **role of the Faculty of Medicine in serving the surrounding community.**
 - Provide **distinguished community and healthcare services** through medical clinics, awareness programs, and training activities.
 - Support **community health improvement** through education, medical services, and preventive programs.
 - Enhance **interaction between the faculty, students, and community stakeholders.**
 - Contribute to **sustainable development and environmental improvement** in the surrounding community.
-

2. Vision

To gain recognition and appreciation from the surrounding community by providing distinguished and effective community services.

3. Mission

Deliver sustainable community services, health awareness programs, and medical support while engaging faculty members and students in community development and environmental improvement activities.

4. Domains of Interest (Areas of Community Service)

The main domains addressed in the plan include:

1. Community Health Services

- Operating and developing **Badr and El-Shorouk outpatient clinics.**
- Increasing clinic capacity and improving healthcare services.

2. Health Education and Awareness

- Implementing **health education programs**.
- Promoting **health literacy** with student participation.

3. Medical Training and Simulation

- Developing the **simulation center** to train healthcare providers.

4. Community Needs Assessment

- Conducting **periodic studies to identify community needs**.
- Holding **focus groups with stakeholders and community organizations**.

5. Student and Faculty Community Participation

- Medical convoys and field visits.
- Student-led awareness projects.
- Increasing volunteer and community service activities.

6. Stakeholder Engagement

- Collecting feedback from **community beneficiaries and labor market organizations**.
- Using surveys and evaluation systems to measure community impact.

7. Partnerships with Governmental and Non-Governmental Organizations

- Building collaborations with **government authorities and NGOs** for community service projects.

8. Technology in Medical Services

- Developing **telemedicine services**.
- Implementing **electronic information systems** for healthcare services.

9. Community-oriented Medical Education

- Integrating **family medicine, geriatrics, and primary healthcare** programs with community needs.

10. Social and Field Research

- Conducting **community-based medical research** addressing societal health issues.
-

5. Goals

Key goals of the plan include:

1. **Enhancing community recognition and trust** in the faculty through quality services.
2. **Updating and activating community service programs** based on community needs.
3. **Increasing participation of faculty and students** in community service activities.
4. Establishing **regular evaluation systems** to measure community satisfaction.
5. Strengthening **stakeholder engagement in decision-making** processes.
6. Promoting the **culture of community service and volunteerism** among students.
7. Developing **partnerships with governmental and non-governmental organizations**.
8. Using **modern technologies such as telemedicine and simulation training** in community services.
9. Integrating **community-based education and field activities** in medical curricula.
10. Updating the **research plan to include more community-based studies**.
